Dr. Jaeger,

Thank you so much for your help last week with my tooth at EXPO. I did make it to the plane trip home where I dumbly started crunching on some ice. Yes, that likely is a measure of my limited intelligence. I am scheduled to have the implant process started in 12 days. I have a flipper in now that I will be wearing for the next 6 months. So there is hope at the end of the tunnel.

I wrote the following letter to the Editor for the Wisconsin State Journal. I hope they publish it and I hope you get some business from it.

I have been coming to World Dairy Expo every year for the past 11 years. This is the key trade show for our magazine, Progressive Dairyman. I've always been impressed with the friendliness of the people I've met in your community, but this year it took on a new meaning for me. Tuesday night at dinner, my FRONT tooth came loose fell out. I did an Internet search for after hours dentistry with no luck. So I showed up the on the doorstep of Hilldale Dental at 8 a.m. the next morning hoping they could address my unfortunate situation. Dr. Fred Jaeger came to the rescue and glued my tooth back in and had me out the door by 9, so I could get to my show responsibilities. I even received a phone call from him that night checking to make sure all was well! Holy cow, the day before this "stranger" didn't know me from a load of hay and here he was making sure I was okay – after hours. Wow. I want to thank Dr. Jaeger and all the folks in Madison for the great hospitality they showed us this year. Thank you!!!

You guys are great! THANKS ONCE AGAIN. ENCLOSED IS OUR MAGAZINE.
